

theatre (ANETIT), folk dance (ANEHOT), science and art. Association of Ankara University Faculty of Pharmacy Students (AUPSG) has collaboration with International Pharmacy Students Federation (IPSF). AUPSG has been working since 1997. Members of the group have organized several conferences and meetings and also a competition with the attendance of 5th-year students called "Patient Knowledge Competition". In addition to domestic activities, increasing number of students from our Faculty are getting training opportunities in abroad and international students are also getting training invitations from Turkey.

The job opportunities for graduates from our faculty are quite large. Although a large majority of graduates prefers to open their own pharmacy store, they can also work in hospitals, pharmaceutical warehouses, public and private research centers, different organizations of ministry of health and pharmaceutical industry.

# ANKARA UNIVERSITY FACULTY OF PHARMACY

Ankara University Faculty of Pharmacy was founded in 16th December 1960. In the early years, Ankara University Faculty of Pharmacy, as the second school which gives pharmacy education but the first faculty of pharmacy in Turkey, served under tough conditions and with a core academic staff.

In 1982, academic organization of the faculty was established as 3 divisions following the foundation of Higher Education Council. According to this organization, division of Pharmaceutical Professional Sciences includes Department of Pharmacy Management, Department of Pharmacology, Department of Pharmaceutical Botany, Department of Pharmacognosy, Department of Pharmaceutical Chemistry and Department of Pharmaceutical Toxicology. Division Basic of Pharmaceutical Sciences includes Department of

Analytical Chemistry, Department of Biochemistry and Department of Pharmaceutical Microbiology. Division of Pharmaceutical Technology includes Department of Pharmaceutical Technology. The courses given in the departments under Division of Basic Pharmaceutical Sciences are fundamentals for pharmacy profession whereas the courses given in other departments are associated with pharmacy profession. The divisions and departments are not qualified for certification, hence our students are graduated as "pharmacist" at the end of their educations. Acedemicians carry on research activities and give graduate courses for PhD and master degree in addition to the undergraduate courses.

## Optional English Courses

New registrated students to our faculty can apply english preparation class which includes computer courses for one additional year. This year is exclud from pharmacy education programme. If the student is succeed in Preparation Class, the grade of English Preparation Class has added to the undergraduate average grade.

## Student Socities

In our Faculty, students can play roles in several companies including trip and environment, photography,
